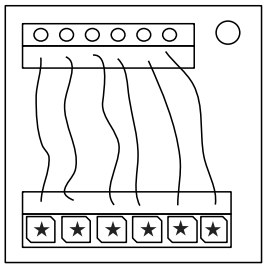
On the Subject of Complicated Wires



These wires aren't like the others. Some have stripes! That makes them completely different. The good news is that we've found a concise set of instructions on what to do about it! Maybe too concise...

- Check the 4 sections one after another.
- If a section applies, cut all wires matching any of its conditions.

Hints:

- PURPLE means that the wire has both RED and BLUE in it.
- Plain WHITE means that the wire has neither RED nor BLUE in it.
- RED means that the wire has no BLUE in it.
- BLUE means that the wire has no RED in it.

Always:

a. LED off, Plain WHITE

b. LED off, RED with STAR

If there are 2+ Batteries:

a. LED on, Plain WHITE with STAR

b. LED on, RED

If there is a Parallel Port:

a. LED on, BLUE

b. LED off, PURPLE with STAR

If the Last Digit of the Serial# is Even:

c. LED off, no STAR

d. PURPLE, no STAR

Compact KV-Diagram

	No RED		Has RED		
LED on	Parallel Port ★		Don't Cut ★	Serial# even	Has BLUE
	Don't Cut	Two or more Batteries ★			No BLUE
LED off	Cut ★		★	Serial# even	
	Serial# even	Don't Cut ★	Parallel Port ★		Has BLUE
	No STAR	STAR		No STAR
